12.00-13.15 Lunch			
13.15- 15.15	Poster session		
15.15-15.45 Coffee b	preak		
15.45-16.20	Eva Novack, Düsseldorf	Paulinella chromatophora – Mechanisms for establishing a photosynthetic organelle	
16.20-16.55	Dio Durnford, New Brunswick	Antenna restructuring following secondary plastid origin in Bigelowiella natans	
16.55-17.30	Andreas Weber, Düsseldorf	How do thermo- acidophilic red algae respond to low temperature	
18.30 Dinner			
Sa, March 28			
Departure			

The meeting will be organized in Schloss Machern, which is about 20 km in the East of Leipzig. From the airport there is a direct S-Train to Leipzig Main Train Station. Machern can be reached simply by public Transport from Leipzig Main Station using the S-Train number S11 in the direction to "Wurzen". Please leave the train in "Machern". From there you find the way indicated "Schloß". It takes about 30 min from Main Station to Machern. The walk from Machern Station to the Castle is about 550 m in 7 mins (Google map distance). The S-train circulates every 30 mins until night (11.pm).

Further information on the location can be found in the web at: http://www.schlossmachern.de/en/

The Castle is surrounded by a large garden inviting for a walk. Machern itself is a small village where you also can find bars and restaurants. However, all participants will be accommodated in the Castle having full board therein.
