

We cordially invite you to the 4th **SNOW ALGAE MEETING**
that will be held in **PRAGUE (Czech Republic)**

3rd – 4th November 2022

in the **historical building**
of the Czech Academy of Sciences
located in the centre of Prague

After successful previous meetings, we want to gather again
researchers from all around the world, interested in the fascinating
realm of snow and glacier ice algae. Please save the date!

Organizing committee:

Linda Nedbalová

Charles University & Institute of Botany CAS

Lenka Procházková

Charles University & Institute of Botany CAS

Jana Kvíderová

University of South Bohemia & Institute of Botany
CAS, all Czech Republic

Daniel Remias

University of Applied Sciences Upper Austria, Austria

Thomas Leya

Fraunhofer IZI-BB, Germany

Session Topics

There will be no parallel sessions. Instead, in a more informal work-shop like atmosphere, colleagues are invited to present and discuss their data and opinions (15+5 min lectures or posters). All aspects of cryoflora (snow and glacier ice algae) are covered, including biodiversity, taxonomy, community structures and interactions, cultivation, cell biology, physiology and adaptation, ecology, bioalbedo, physics and chemistry of melting snow and glaciers.

Registration

The registration will be launched **in August**, a moderate registration fee will include drinks and snacks in-between session and common dinner.

Deadline: 30 September 2022

Venue location & Accommodation

SAM 2022 will take place at Czech Academy of Sciences, Národní 3, 117 20 Staré Město, Prague, Czechia. <https://mapy.cz/s/memanolece>

Please look for your own accommodation. Prague is a fascinating historical city offering a plenty of possibilities for sightseeing, enjoying the local brands of beer.

We are looking forward to seeing You in Prague!
